(The issue number is given in front of the page numbers)

- Angel, E., *see* Chang, L.C. (1) 39- 69
Aumann, G., Canal surfaces versus normal ringed surfaces (*Letter to the Editors*) (4) 475-476
- Barnhill, R.E., *see* Hansford, D. (5) 519-531
Bein, W.W., *see* Chang, L.C. (1) 39- 69
Bercovier, M. and A. Jacobi, Minimization, constraints and composite Bézier curves (5) 533-563
- Carnicer, J.M. and J.M. Peña, Totally positive bases for shape preserving curve design and optimality of B-splines (6) 633-654
Chang, G. and T.W. Sederberg, Nonnegative quadratic Bézier triangular patches (*Short Communication*) (1) 113-116
Chang, L.C., W.W. Bein and E. Angel, Surface intersection using parallelism (1) 39- 69
Chang, W.-T., *see* Hsieh, H.-C. (1) 71- 95
Chen, F.L., *see* Feng, Y.Y. (1) 97-107
Chen, J.-L., *see* Hamann, B. (3) 289-301
Chen, J.-L., *see* Hamann, B. (5) 477-489
Cheng, C. and Y.F. Zheng, Thin plate spline surface approximation using Coons' patches (3) 269-287
Cottin, C. and R. van Damme, Construction of a VC1 interpolant over triangles via edge deletion (6) 675-686
- Duchaineau, M.A., Using general polar values as control points for polynomial curves (4) 411-423
- Eisele, E.F., Best approximations of symmetric surfaces by biquadratic Bézier surfaces (3) 331-343
- Farin, G., *see* Hansford, D. (5) 519-531
Farouki, R.T., The conformal map $z \rightarrow z^2$ of the hodograph plane (4) 363-390
Farouki, R.T. and J.K. Johnstone, The bisector of a point and a plane parametric curve (2) 117-151
Feng, Y.Y., F.L. Chen and H.L. Zhou, The invariance of weak convexity conditions of B-nets with respect to subdivision (1) 97-107
- Geise, G. and Th. Nestler, Bézier representation of conics of contact in the projective plane (3) 233-245
Gregory, J.A. and J. Zhou, Filling polygonal holes with bicubic patches (4) 391-410
- Hamann, B., A data reduction scheme for triangulated surfaces (2) 197-214
Hamann, B., Curvature approximation of 3D manifolds in 4D space (6) 621-632
Hamann, B. and J.-L. Chen, Data point selection for piecewise linear curve approximation (3) 289-301
Hamann, B. and J.-L. Chen, Data point selection for piecewise trilinear approximation (5) 477-489
Hansford, D., R.E. Barnhill and G. Farin, Curves with quadric boundary precision (5) 519-531
Hsieh, H.-C. and W.-T. Chang, Virtual knot technique for curve fitting of rapidly varying data (1) 71- 95

- Jacobi, A., *see* Bercovier, M. (5) 533-563
 Joe, B. and W. Wang, Reparameterization of rational triangular Bézier surfaces (4) 345-361
 Johnstone, J.K., *see* Farouki, R.T. (2) 117-151
- Kaklis, P.D. and N.S. Sapidis, Curvature-sign-type boundary conditions in parametric cubic-spline interpolation (4) 425-450
 Klimaszewski, K.S., *see* Sederberg, T.W. (6) 687-706
- Lai, M.-J., Approximation order from bivariate C^1 -cubics on a four-directional mesh is full (2) 215-223
 Lee, E.T.Y., Remarks on an identity related to degree elevation (*Short Communication*) (1) 109-111
 Lee, E.T.Y., Computing a chain of blossoms, with application to products of splines (6) 597-620
 Le Méhauté, A. and F.I. Utreras, Convexity-preserving interpolatory subdivision (1) 17- 37
